Projects/Work

Game Bargains : <https://game-bargains.onrender.com/>

This project is a video game app that searches for savings based on the top 60 games with the highest Metacritic scores of the week. The user can view game info, "favorite" games on sale, and keep track of prices with their wish list.

Password Generator:

<https://ceewizz.github.io/PasswordGen/>

A Password Generator using JavaScript that enables employees to generate random passwords based on criteria that they've selected.

Video Vault :

<https://video-vault-a9fdebd79a00.herokuapp.com/>

-The motivation behind this project was to test our knowledge of what we've learned throughout the course and to culminate it into a full stack web application. We were able to build a full stack application using our knowledge of Javascript, SQL, Node, Sequelize, Express-session, and cookies. The project that we created is called VideoVault, its a full stack web application that store links of video, as well as images from multiple social media

Commented [CH1]:

Coding Quiz:

<https://ceewizz.github.io/CodeQuiz>

- A timed quiz on JavaScript fundamentals that stores high scores SO THAT I can gauge my progress compared to my peers.

Progressive Web Applications (PWA Text Editor):

<https://pwatexteditor-cwz-e3c67fb4c29e.herokuapp.com/>

- Progressive Web Applications (PWA) Challenge: Text Editor As you have progressed through this course, you have put together a number of impressive projects that you can show off to potential employers. This project is no exception; in fact, it features some of the most impressive expressions of the concepts you have learned so far.
